OVERVIEW

I am a product designer who specializing in UI, motion, and interactive design, with 3+ years of experience across finance, insurance, and cross-disciplinary product work, leading and contributing to projects that shipped. I translate complex information architecture and brand guidelines into modular, consistent visual systems that can scale with the product.

EDUCATION

Fachhochschule Potsdam — Potsdam, Germany
Interface Design (Exchange) — 2023–2024

National Taipei University of Technology — Taipei, Taiwan
Interaction Design, Multimedia Track (B.Sc Degree | GPA 3.96/4) — 2019–2023

WORK EXPERIENCE

AJA Creative — Taipei, Taiwan
UI Designer — May 2025 – Now

- Led the visual proposal for an insurance website redesign, translating the brand story into a stronger digital experience; built high-fidelity prototypes to speed up client discussion and decisions; turned 255 pages structured by the UX designer into 46 modular UI templates, reducing development and maintenance costs; extended the client's design system with new components and refined color and typography hierarchy to meet WCAG, improving readability for older and low-vision users.
- Built a design system based on WCAG AA requirements for a bank website redesign, establishing a shared implementation baseline for three designers. Introduced modular and component-based practices to consolidate fragmented visual outputs into a consistent, reusable system; grounded visual decisions in competitive analysis and brand positioning, and worked with the client's UI team through 10+ rounds of iteration to finalize the design direction. Consolidated and handed over completed components and guidelines, enabling the client team to continue using and extending the system.
- Worked with AI agents to lay out pages, create image mockups and produce Figma motion. With no engineering team, vibe-coded a static design into a complete web page and integrated it into the company's live website, so the design could launch without waiting on developers.

Freelance — Remote
Designer — 2023 – Now

- Helped early-stage AI, Web3 and edtech teams build a trustworthy product image that stands out.
- Provided visual proposals, web design and motion graphics, and independently built and launched sites in WordPress so clients could update the content themselves.

UXI Design Co., Ltd. — Taipei, Taiwan
UI/UX Design Intern — Apr 2022 – Apr 2023

- Started a cloud photo album app's feature work from user research and insight analysis to pin down the real need; delivered the sitemap, wireframes, and UI, with IX flows written so engineers could read them quickly and build straight from the specs; modularized the components so new business needs could ship by extending the library rather than redrawing it.
- Illustrated a healing IP character for a psychiatric clinic's patient-journaling platform, keeping the interface warm and approachable so logging one's own condition feels less daunting, and supported the UI design.
- Led the key visual for a government publicity campaign and carried it across 10+ materials — posters, flyers, invitations, badges, stickers — so the campaign stayed recognizable everywhere, built up public recall, and helped attendees find booths and staff on site.

NTUT Center for General Education

Taipei, Taiwan

Visual Designer (Part-time)

Apr 2022 – Dec 2022

- Designed event posters and website motion graphics for the Center for General Education. Gave each event its own style based on its theme while keeping the text easy to read, so students were drawn in by the visuals and could still get the event details clearly. Added motion graphics to the once-static website to make it feel more lively and to guide visitors to click through to each event.
- Helped design visuals for library events, keeping one style across all promotional materials so the messages were easy to recognise.

MIFLY | Mind & Idea Fly

Remote

Article Writing & Translation

Apr 2021 – Sep 2021

- Helped write tutorial articles for MARKAR, the company's XR product, so users new to XR could start on their own and get creative; also handled Chinese–English translation and back-end publishing for overseas users.
- Took part in a corporate training project, learning how MARKAR could be used in teaching materials and helping bring it into school classrooms.

INDUSTRY–ACADEMIA & VOLUNTEERING PROJECTS

Digital Nomads: Global Lifestyle Rise and Local Impact

Berlin, Germany

With Urban Journalist Network (UJN)

Apr – May 2024

- Worked with cross-cultural teammates and brought an outsider's read to a German local issue,proposing perspectives that complemented those of local classmates; contributed to early data collection and research, then led the visual design and web build, using scrollytelling to turn fragmented data into an engaging narrative about how digital nomads affect local communities; visualized the data with Datawrapper, D3.js, and illustration, with a warm, friendly interface style that make complex information more accessible.

Karl's Wächter — Medical Children's Book

Potsdam, Germany

With Miethke

Oct 2023 – Jan 2024

- Industry collaboration with Miethke, a hydrocephalus shunt manufacturer. Using visual storytelling and information design to illustrate an educational picture book, translating an implanted medical device into a story children aged 6–12 could follow.

Cocoon — NTUT Interaction Design Graduation Exhibition

Taipei, Taiwan

Exhibition Space Committee Member

2023

- Led and designed the UI/UX of the online exhibition site, collaborating with classmates from engineering and 3D backgrounds. Leveraged an understanding of development constraints to define the visual and interaction scope early, enabling people who could not attend in person to explore the exhibition online and extending its reach beyond the physical event.
